OBJECTIVE

“BCA student with hands-on experience in web and software development, specializing in MERN stack. Seeking an entry-level Frontend & Backend or Full-Stack Developer role to apply practical skills in real-world development.”

EDUCATION

- **DEGREE** – (BCA) *Aditya school of computer science*, Kakinada | 2023–2026 | CGPA: 7.0
- **INTERMEDIATE** – BSR *Junior College*, Divili | 2023 | CGPA: 5.6
- **SSC (10th Class)** – ZPP *High School*, Kandrakota | 2020 | CGPA: 7.7

SKILLS

- **Programming Languages:** C, Python, Java (Basics).
- **Web:** HTML, CSS, JavaScript, MERN.
- **Tools:** VS Code, Git, GitHub.
- **Database:** MySQL (Basics).
- **Soft Skills:** Communication, Creative Thinking, Quick Learner, Teamwork and Time management.

EXPERIENCE

MERN Stack Intern

Aditya Degree College, Kakinada | **Apr – Jun 2025**

- Completed a certified internship focused on full-stack web development using MERN.
- Built projects using React, HTML/CSS, Node.js, and MongoDB through hands-on training.
- Gained real-world experience in backend APIs, frontend logic, and collaborative workflows.
- Actively applying to web & software development internships to gain further experience.

PROJECTS & PORTFOLIO

Personal Portfolio Website

[🐙 My portfolio](#)

A **single-page** responsive site to showcase professional profile, projects, and contact links.

- Built a custom portfolio using **HTML**, **CSS**, and **JavaScript** with animated sections.
- Added interactive project and LinkedIn links to improve personal branding and recruiter engagement.
- Designed with responsive layout, smooth animations (**fadeIn**, **slideUp**), and mobile-first performance.
- Optimized layout for readability, fast loading, and clean navigation across **all devices**.

Websites Package – All-in-One Web Launcher

[🐙 Web Launcher](#)

- Created a responsive single-page web application that **categorizes popular websites** into sections, enabling fast and organized access from one central hub using **HTML&CSS**.
- Applied flexbox layout and **hover** animations for smooth, interactive navigation.
- Designed a **mobile-friendly** UI ensuring consistent experience across devices.

CareerPath – Smart Job Suggestion Platform

[🐙 Smart Job Finder](#)

A frontend web app that suggests careers based on user input using custom logic and animations.

- Built a responsive multi-page interface (**index.html**, **result.html**) using **HTML**, **CSS**, and **JavaScript**
- Applied client-side decision logic to deliver instant, personalized career paths with no backend
- Designed animated forms and **Dynamic** UI for smooth, app-like user experience across devices
